Politics and the Architecture of Choice: Involving stakeholders to become part of the policy creation process naturally leads to their participation in the evaluation process.

The purpose of discussing information processing is to comprehend how in context. The first component, what is the nature of the evidence being created by researchers to be utilized in EDBM, and the second component, what practices can foster better decision making on the part of the policy makers: . On the Reality and Rationality hand, he wants a theory of confirmation to have a suitably objective basis; that is why he rejects the orthodox Bayesian view that the priors are nothing more than some agent's subjective degrees of belief, criticizable only if they fail to conform to the probability calculus. Leadership Reality and Rationality Information Processing.

Group decision making has its own limitations see Bazerman, for in-depth discussion. A policy maker may then fail to account for the risk factors associated with contracting meningitis, which are statistically less probable than risks associated with contracting other contagious diseases such as measles [96].
