Give me a break gentlemen readers and other Goodreads reviewers! It requires very little energy to knock a glass over and smash it The main idea to take away from this book is that time has a clear direction.

That argument hasn't changed with his theories. But there are quite a few people, whose curiosity and desire to find out more, to explore the truths of this vast universe, never dies. As for why humans experience these three arrows of time going in the same direction, Hawking postulates that humans have been living in the expanding phase of the universe. Then, Friedmann's first assumption was proved as true.

If not, where did it come from? At first, events were considered random and controlled by human-like emotional spirits. Only comparable feeling is the one with ...more When I was reading the chapter black holes ain't so black, man you can't express that kinda feeling in words!
