At the Intersection of Hydrology, Economics, and Law: Legal, economic, and hydrological issues associated with various incentive mechanisms. As we cover porous surfaces with impervious structures—commercial buildings, parking lots, roads, and houses—finding places for rainwater and snowmelt to soak in becomes harder.

Second, because LID approaches shift at least some of the responsibility for By Dallas Burtraw Resources Radio: Promoting LID approaches to stormwater management in new construction is a different

challenge, but one worth meeting because LID is most cost-effective when implemented at the design stage rather than as a retrofit.
