A January study found that for patients with one of five common surgical conditions admitted My Year of Expansion an academic medical center or affiliated hospital, expansion was associated with a significantly greater probability of receiving optimal care. We will continue to monitor and update these findings as additional studies and state experiences provide insight into how various factors shape coverage, access to care, and costs in Medicaid expansion states and as states continue to consider expansion and reshape 2013 coverage. In comparison, non-expansion states have experienced slower enrollment growth.
