The role of the general practitioner in the management of transgender patients is discussed and we consider whether hormone therapy should be initiated in primary care in the absence of specialist advice, as is suggested by recent General Medical Council guidance. Gender Identity Research and Education Society, The rational clinical examination systematic review.

Why does my shoulder hurt? Refer regardless of whether they are actively seeking help. This article, if it is supposed to be a guide for general practitioners, is just about useless. Most often there is a sense of feeling female although born male or vice versa but sometimes a sense of mixed gender or neutrality.
